

There are four parts...

Bottom base part

middle frame part

Leather top part

Bubble wrapped

First for the bottom base part

Place the middle bar in between the two hole on each side, then screw in the screws on both side, It was a bit dark but I you can see a bit of the screw circle in red on the bottom right hand corner

Place the leather piece between the loop and snap it around the base and the loop.

Tie the pillow with the buckle loop

Enjoy your daybed~
