

# STOP!

Before you start...

1

Read instructions carefully.

3

Carefully identify each component, especially those that are similar. The most common mistake is getting things back to front.

5

DO NOT over-tighten screws

2

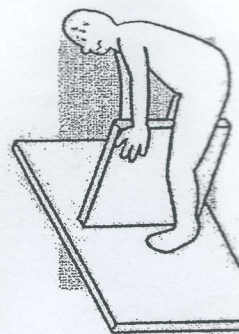

Lay out all components on a soft surface as if you were preparing to do a jigsaw puzzle.

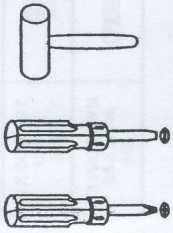

Separate and identify each component from the hardware pack and rest each one on its proper location before fastening.

6

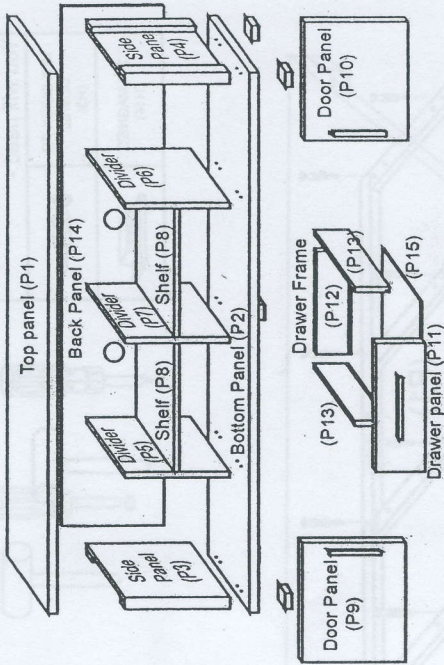

DO NOT set glue until you are certain that the parts belong together.
